

BTC+ (Bitcoin Plus) — Whitepaper

1. Introduction

BTC+ (Bitcoin Plus) is a community-driven crypto token built on the BNB Chain (BEP-20), designed to provide fast transactions, low fees, and simple USDT-based trading. Inspired by the principles of transparency and accessibility in decentralized finance, BTC+ aims to create a fair and open environment for early supporters and everyday users.

BTC+ is not a fork of Bitcoin and is not affiliated with Bitcoin. It is an independent token project that adopts a fair-launch philosophy and prioritizes community trust.

2. Vision

Our vision is to build a transparent, easy-to-access crypto project where:

- Users can trade easily using USDT
- Early supporters are rewarded
- Liquidity and ownership practices build long-term trust
- Growth happens gradually and responsibly

3. Problem Statement

Many token launches suffer from:

- Hidden allocations and private sales
- Unlocked liquidity leading to rug pulls
- Complex buying processes
- Lack of transparency

BTC+ addresses these issues with a fair-launch model, locked liquidity, and simple USDT pairing.

4. Solution

BTC+ provides:

- Fair launch with no private sale
- BTC+ / USDT pair for simple trading
- Liquidity lock for safety
- Ownership renouncement for decentralization

- Community-first growth strategy
