

Zynex Blockchain – Updated Multi-Token Whitepaper

This updated whitepaper includes the latest multi-token ecosystem of Zynex Blockchain. PandaPepe (PEPE) has been fully replaced with the new official token: ZENORA (ZNR).

ZYNEX (ZYN)

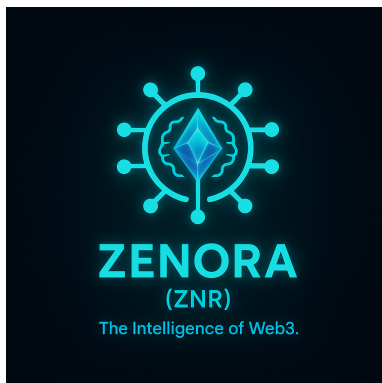

ZYNEX (ZYN) is the core utility and governance token powering staking, gas fees, DAO operations, and cross-chain infrastructure.

NeuraX (NXR)

NeuraX (NXR) is an AI-driven token powering neural data compute, automation tools, ML-based analytics, and intelligent Web3 utilities.

ZENORA (ZNR)

ZENORA (ZNR) is a high supply hyperdeflationary token designed for fast decentralized trading, large scale community growth, liquidity scaling, and onchain analytics.

Etheron (ETN)

Etheron (ETN) is a next generation digital asset focused on high speed decentralized trading, strong liquidity, advanced token analytics, and long term sustainability.

ZENORA (ZNR)

ZENORA (ZNR) is an AI-powered Web3 intelligence token on Base, built to power on-chain analytics, DeFi signal detection, and next-generation decentralized insights within the Zynex ecosystem.
